Profile

Systems and cybersecurity technician with a solid and continuously growing academic background. My path —from an Intermediate Vocational Diploma in Microcomputer Systems and Networks (SMR) to a Higher Vocational Diploma in Network Systems Administration (ASIR) and a Master's in Cybersecurity, Ethical Hacking and Offensive Security — has given me a progressive command of systems, networks and both offensive and defensive security. Each qualification has strengthened my analytical thinking, technical autonomy and a structured approach to problem-solving. I learn fast and enjoy applying what I learn to protect systems and infrastructures.

Experience

Head Cashier

2025 – Present

Corral de la Morería

Management of the cash desk and control of daily operations, including cash counts and closing, ensuring financial accuracy at one of the most internationally renowned flamenco restaurants and tablaos.

Venue Manager

2024 – 2025

Hospitality sector

Supervision and coordination of the venue's daily operations: team management and training, shift planning, stock and order control, cash opening and closing, and ensuring service quality.

Access Control System

2024

Kubernetes

Design and implementation of an access control system, covering both the physical device and the web management application, with a focus on security and remote connectivity.

Education

Master's in Cybersecurity, Ethical Hacking and Offensive Security

2026

EIP International Business School

1,700 hours · 68 ECTS

Higher Vocational Diploma (ASIR)

2025 – Present

CEAC FP · Network Systems Administration

Intermediate Vocational Diploma (SMR)

2022 – 2024

IES Palomeras Vallecas · Microcomputer Systems and Networks

Technical Skills

- Ethical hacking & pentesting
- Offensive security
- Vulnerability assessment
- Networks & systems (Linux/Windows)
- Systems administration
- Incident response (Blue Team)

Management

- Team leadership
- Operations management
- Customer service
- Fast learner
